EDUCATION

Expected in 06/2028
Bachelor Of Technology:
Computer Science Engineering
MIT World Peace University
Pune

04/2024
Junior College:
Matoshir Jr. College
Ekhare, Nashik

05/2022
High School:
Maratha Highschool
Nashik

ACHIEVEMENT

- Ranked 4th in Pune for Yi Future 6.0
- Ranked 58th out of 870 for ISRO’s Bhartiya Antariskh Hackathon

PUSHKAR GANGURDE

SUMMARY

Third-year CSE student with experience in **AI/ML, software development, hackathons, and freelance projects**. Skilled in building practical technology solutions and working in collaborative teams, with demonstrated leadership through student organizations and competitive achievements.

EXPERIENCE

Aura - Freelancer
Nashik, India
07/2025 - 09/2025

- Implemented responsive design principles for mobile compatibility across devices.
- Conducted market research to identify trends and inform project strategies.
- Collaborated with clients to understand their needs and deliver tailored solutions.

AKIS - Freelancer
Pune, India
11/2024 - 03/2025

- Developed user-friendly web applications using HTML, CSS, and JavaScript.
- Worked closely with designers to implement UI and UX designs accurately in the codebase.
- Implemented SEO best practices to improve website visibility and search engine ranking.

PERSONAL INFORMATION

- Computer Science Engineering Student | Third Year
- CII Young Indians Student Chapter MIT-WPU | Co-Chair, Events and Ops, and Innovation Member
- Cricket Captain | School & Nashik U-16
- Professional Tabla Artist

PROJECTS

SignBridge | Python, ML, Computer Vision, ANN, Mediapipe

- Developed a real-time Indian Sign Language (ISL) recognition system using MediaPipe hand landmarks and a Keras MLP model.
- Trained the MVP to recognize 35 static ISL classes (A–Z, 1–9) from camera input.
- Implemented wrist-relative landmark normalization to create a lightweight 42-feature representation for classification.
- Integrated AI-based sentence reconstruction to convert recognized sign sequences into meaningful text.
- Added English, Hindi and Marathi language output with optional browser-based Text-to-Speech.
- Built an interactive ISL Learn Mode for users to learn and practice supported signs.
- Developed the platform using React, Vite, Tailwind CSS, Python, Flask, MediaPipe and TensorFlow/Keras.

FasalMitra | Python, Flask, ResNet9, MongoDB, Reds

- Developed a smart agriculture platform using microservices and a ResNet9 deep-learning model for agricultural analysis.
- Built Flask ML APIs with MongoDB/Redis authentication and integrated services through an Nginx API gateway.

AI-Scout | Python, YoloV8, OpenCV, PyTorch, Streamlit

- Built a computer vision system for football player detection, tracking, and performance analysis.
- Implemented speed, distance, movement analytics, player trajectories, heatmaps, and an interactive Streamlit dashboard.

O.V.I. | Python, FastAPI, Oillama, Qwen3, Electron, ChromaDB

- Built a privacy-first local AI desktop assistant supporting voice interaction, PC automation, screen analysis, and cross-device control.
- Integrated local LLM inference, speech processing, long-term memory, and WebSock-based device communication.
